EDUCATION

University of Western Ontario

September 2024 – May 2028

Bachelor of Engineering Science (Dual Degree) – Mechatronics + Artificial Intelligence Systems

London, Ontario

- Dean's Honour List (2024–2025, 2025–2026)
- Involvements: Geography People's Society (AVP Social Media), WE FIRST Robotics

EXPERIENCE

Women in Engineering, Western University

May 2026 – Present

VP of Design

London, Ontario

- Led end-to-end redesign of the Women in Engineering website and visual identity, using member feedback to fix usability issues and improve member and sponsor navigation.
- Built the site in Framer for a club of **120+** students, alumni, and faculty, with a restructured sponsors page for its **10 current sponsors**.

Cavendish Farms

May 2026 – August 2026

Project Management Intern

New Annan, PE

- Drove **4 engineering projects in 4 months** across the full project cycle: validating designs, funding requests, organizing schedules, contractor quotes, proposal reviews, writing SOPs, leading site tours, and overseeing installation.
- Built a project prioritization tool for the project engineering manager that tracks budgets, forecasts 5 years out, and ranks projects with scoring matrices for safety, need, consumer demand, and feasibility.
- Automated a plant-wide gate log for security to timestamp trucks entering and leaving the site, providing a 24/7 record.
- Designed and produced **80+** arc flash and machinery labels to improve site safety.

BGC Engineering Inc.

May 2025 – August 2025

Research Laboratory Technician

Vancouver, B.C.

- Created **4 tutorial videos for remote training**, trained employees on sample preparation and pXRF machinery operation.
- Contributed to the development of an internal SOP, **doubling hourly project output** from **11 to 23** samples.
- Prepared **300+** rock samples and led elemental analysis and data synthesis for **600+**.

DESIGN PROJECTS

Discify | Personal Project

September 2026

- Designed, prototyped, and built a working Spotify desktop extension awarding collectible badges for listening to a full album.
- Owned the project end-to-end, from concept and interaction design to final product, matching Spotify's native UI.

Slouchy | Cornell UX Designathon

May 2026

- Designed a macOS menu bar app in Figma that builds the habit of good posture, gamifying progress tracking to retain users.
- Won **2nd place out of 71 participants** at the Cornell UX Designathon.

Humanoid Robot Arm | Faculty-Commissioned Engineering Project

April 2026 – Present

- Designed a locking rotating shoulder and bayonet-mount swappable hands, optimized for 3D printing, for a life-size humanoid robot that teaches physics to **700+ first-year engineering students** at UWO.
- Led early component research and sourcing in a **2-person subteam on a 16-person, 6-subteam build**.

PROGRAMS

RBC Design Thinking Program, Western University

September 2026 – Present

Participant

London, Ontario

- Working with RBC mentors across product fields on a new-market-opportunity project to increase accessibility of rehab and assistive services for Canadians in remote communities.

SKILLS & TOOLS

Skills: UI/UX Design, Wireframing, Rapid Prototyping, Web Design, Visual Branding, Mechanical Design

Tools: Figma (Design, Make, FigJam), Framer, Git/GitHub, Adobe Creative Suite (Photoshop, After Effects), Blender, Generative AI & LLMs (Claude, Claude Code), Canva, AutoCAD, SolidWorks, Onshape, Excel

Languages: Python, Java, C++, JavaScript
